

[SET OF GOLF CLUBS WITH CONSISTENT HOSEL OFFSET(Docket Number PU2175)]

Abstract

A set of golf clubs that have equal face progressions as measured from a center line of a hosel to a farthest front portion of a front wall. The set of golf clubs also have equal hosel offsets as measured from a farthest front portion of the hosel to a farthest front portion of the front wall. The set of golf clubs preferably consists of a driver, a plurality of fairway woods and a plurality of irons, with each of the club heads having a lower center of gravity and increased moment of inertia. Each golf club preferably has a hosel offset of approximately zero.
